08018 Barcelona, Spain

### RELEASE DATE

September 26<sup>th</sup>, 2025 at 13:30 CEST

### **Zoundream raises €4M in seed round to accelerate infant health innovation**

Zoundream, pioneering health-tech startup, today announced the successful closing of its Seed funding round, securing €4M to advance its mission of revolutionizing infant health. The round was led by CRB Health Tech, together with Verge HealthTech Fund and including TQ Ventures, Mission Gate, Granatus Tech Fund, House of Insurtech Switzerland and Secways Ventures.

Zoundream's AI-powered solution is the world leading solution for the analysis of infant voice, trusted and used by the major juvenile brands worldwide. By analyzing newborn cries and vocalizations, Zoundream delivers powerful, actionable insights — not only translating infants' real-time needs, but also flagging critical patterns that serve as the earliest indicators for health conditions like gastrointestinal distress and atypical neurodevelopment.

All achieved non-invasively through the power of voice, at an age where early intervention is life-changing. For families, this means profound peace of mind and empowerment. For healthcare providers, a revolutionary tool to augment their expertise, enabling earlier and more effective action. And for the infants, the chance to improve their lives forever — just by being heard.

### **A mission with global impact**

Headquartered in Basel, Switzerland, and Barcelona, Spain, Zoundream was founded with a bold vision: to ensure that no baby's voice in the world goes unheard. Because we all deserve to be listened to, from day 1. With its technology already reaching thousands of families worldwide, the company is setting a new standard in early childhood care by combining advanced science with real-world impact.

### **From home to hospital**

Zoundream's solution is already integrated into baby monitors from leading global brands including Philips Avent, Maxi-Cosi, Motorola Nursery, and additional collaborations underway. Beyond the home, Zoundream partners with world-class hospitals and health institutions, including

Hospital Clínic Barcelona, University Medical Center Utrecht, and University Children's Hospital Zurich, to integrate its technology and expand its use in healthcare systems. The company's vision is to make its solution the standard of care in neonatology, ensuring that every baby's voice contributes to healthier outcomes from the very start of life.

## **Shaping the future of infant health**

This €4M Seed Round marks a decisive step forward. With fresh resources and sector-expert investors, Zoundream will accelerate product innovation, expand globally, and pioneer a new era where every baby's voice can be understood, for the best outcome for the infant and the family, worldwide.

## **Roberto Iannone, CEO & Co-Founder of Zoundream:**

*"Closing this Seed Round is a pivotal moment for Zoundream. With the support of experienced investors specifically focused on the health-tech segment, we're empowered to accelerate our roadmap, deepen clinical validation, and bring infant health insights to parents and healthcare professionals across continents."*

## **Ignasi Heras, Partner of CRB HealthTech:**

*"We're thrilled to back Zoundream's groundbreaking approach to neonatal health. Their blend of clinical-grade AI and consumer accessibility positions them as leaders in early-detection baby tech."*

## **About Zoundream**

Zoundream, founded in 2019, is a health-tech startup based in Basel, Switzerland and Barcelona, Spain. The company specializes in AI-driven solutions for infant voice analysis, including cry analysis, and soon, non-invasive early detection of pathologies and neurodevelopmental conditions using voice.

Zoundream collaborates with hospitals and key organizations across Europe, North America, South America, and Asia, continuously expanding its knowledge and improving infant health monitoring solutions globally.
